Stage Drapery

How to fill in free estimate form for an accurate quotation.

- 1) Please provide us with the full contact information for your site.
- 2) Start at the front of the stage, measure height of Main Draw and width of tracks they are hanging on. For the width, lay tape on floor below track. Most drapes are in pairs, so you only need to measure one of each set. Measure rest of drapery in similar manner.
- 3) Please make note of any rips or repairs required to and of the Drapery or Tracks.
- 4) Identify any existing stains.
- 5) Please take pictures of the stage as follows:
 - a. From front with drapes closed
 - b. From front with drapes open
 - c. Picture of each type of drape
 - d. Picture of each repair required
 - e. Picture of all Stains
- 6) Tug Test: Check the integrity of your fabric by attempting to rip it like a piece of paper. If it rips easily and falls apart in your hands, these cannot be cleaned, you need new drapes.
